

OUT OF PAPER

WORST CASE SCENARIO

“Printer 4 is doing okay on paper”

“Printer 3 is also doing fine on paper”

“Same story for printer 2”

“Oh-oh, printer 1 is almost out of paper, should refill the tray immediately”

“Hopefully I’m still in time, otherwise the printer will shut down”

“Just barely made it in time. I’m wasting so much time checking the printers all day long”
